- Leadership
- Presentation
- Project Management
- Good Communication

Here is my GitHub account for some of
my projects - [@chivicoko](#)

Experience

Australian Contract — Full Stack Python Developer (April - July 2024)

This an Australia-based contract in which I do mostly web scraping, managing and updating the company's private web/desktop application. I use python and PyQt (with Pypeteer, BeautifulSoup) mostly. I also work on the UIs as need be.

Premium ESOWP Limited, Awka Nigeria — Full-stack (Mostly frontend - ReactJs) Developer (May 2023 – June 2024)

My role at Premium ESOWP Limited is to transfer figma design into pixel-perfect code, and sometimes implement the backend functionalities. I and the rest of the team use these technologies for our projects - HTML, CSS, JavaScript, Bootstrap, jQuery, React, PHP and Python.

Dufuna Code Camp, Ibadan Nigeria — (Trainee) Full Stack Developer (July 2022 - January 2023)

Received 4 months practical training and mentorship on software development using Javascript, PHP, CSS, HTML, React, Slim, Eloquent.

Built multiple applications like a full stack shopping app (php), customer service app (reactjs), music app (MERN stack) as part of my training projects.

University of Michigan — (Trainee) Python Developer (April 2020 - October 2020)

Received 6 months intensive hands-on training on the Basics and Rudiments of Python programming language, in the Coursera platform.

Successfully built a full blog app using Python and Django

Education

Nnamdi Azikiwe University, Awka, Nigeria — BSc Geography and Meteorology(November 2015 - July 2020.)

Projects

Socialize — February 2024

A social media application built with Next.Js, Typescript, Prisma ORM, Clerk. It's very user friendly and responsive. It's still an ongoing project that is aimed at helping make all forms of communication amongst peers much easier. The [GitHub link](#).

Also check out devlinks, built for easy storage of links for devs - [devlinks](#) [The GitHub link](#). It's meant to make it easier for developers to retrieve there links whenever needed.

Sweettooth Mini Store — May 2024

A user-friendly, fully responsive mini online store for buying and selling of fast food and candies. Built with React.js and Typescript. [Preview](#) . The [GitHub Link](#)
