

Devo-Data Coding Test (React JS Intern)

Project: Task Tracker App

Description:

Develop a Task Tracker application using React.js. The application should allow users to add, edit, delete, and mark tasks as completed.

Key Features:

Task List:

- Display a list of tasks, each showing the task name and completion status.

Add Task:

- Implement a form to add new tasks.

Edit Task:

- Allow users to edit existing tasks.

Delete Task:

- Provide functionality to delete tasks.

Mark as Completed:

- Allow users to mark tasks as completed.

Task Categories:

- Introduce task categories (e.g., Personal, Work) and allow users to categorize tasks.

Responsive Design:

- Ensure the application is responsive and works well on various screen sizes.
