VICTOR OKOYE – Full-stack Software Developer

victorokoye.com – victor.c.okoye@gmail.com – linkedin - +2348028845693

Experienced full-stack developer with over four (4) years of experience. Successfully helped boost the automated running of a company by about 25% through the building of an ERP system for the company. Aiming to apply my expertise in web development to help a dynamic company create good software to achieve excellent UIs and user experiences, drive innovation and achieve its growth objectives.

SKILLS

HTML, CSS, JavaScript, React.js, Next.js, Python, Django, MongoDB, MySQL, Git, Docker

PROJECTS

Socialize   **Next.js, Typescript, TailwindCSS, MUI, Prisma ORM, Clerk, MongoDB**

A social media application built with Next.js, Typescript, TailwindCSS, MUI, Prisma ORM, Clerk, and MongoDB. It is very user friendly and responsive. It is an ongoing project that is aimed at helping make all forms of communication amongst peers much easier. Preview   [Github link](Github)

Sweettooth Mini Store   **React.js, Typescript, SASS, MUI**

A user-friendly, fully responsive mini online store for buying and selling of fast-food and candies. Built with React.js, Typescript, Vite, SASS, and MUI. Preview   [Github link](Github)

Devlinks   **Next.js, Typescript, TailwindCSS, MUI, MongoDB**

A links sharing application built with Next.js, Typescript, TailwindCSS, MUI, and MongoDB. It is very user friendly and responsive. While it is built mainly for developers for easy access and sharing of their links and urls, any other person can also it for the same purpose. Preview   [Github link](Github)

EXPERIENCE

Australian Contract   **Full-stack Developer (April – July 2024)**

This is an Australia-based contract in which I did mostly web scraping, managing and updating the company's private web/desktop application which scrapes data from different online platforms and stores them in the company's platform. I worked as a solo developer using Python, PyQT, Pyppeteer, BeautifulSoup, developing and updating the platform as needed.

Premium ESOWP Limited, Awka Nigeria   **Full-stack Developer (May 2023 – April 2024)**

Worked as a full-stack developer, mainly on the frontend side. Collaborated with the UI/UX/graphics guys and the backend guys to always satisfy our clients' needs. I and the teams developed websites for different schools and businesses to help automate most of their operations. I worked with HTML, CSS, JavaScript, jQuery, Bootstrap, React.js, PHP and Python as needed, while developing on the job as well.

Sweettooth Mini Store   **React.js, Typescript, Prisma ORM, Clerk**

A social media application built with Next.js, Typescript, Prisma ORM, Clerk. It is very user friendly and responsive. It is an ongoing project that is aimed at helping make all forms of communication amongst peers much easier. [Github link](Github)
